21 February 2012

**TO WHOM IT MAY CONCERN**

**STUMBELBLOC SYSTEM**

We have been approached by Messrs. Gardini Construction to review the technical aspects of the product: Stumbelbloc System which is a robust solution in terms of providing a precast concrete masonry building block and is specifically designed to be used in a multitude of uses in the building industry. The block can either be factory or manually manufactured using specially designed moulds.

We are of the opinion that this system will greatly enhance the production of current owner built houses and accelerate housing delivery to the local populace.

Brian Colquhoun Hugh O' Donnell & Partners are pleased to affix their professional approval of the Stumbelblock System.

Yours faithfully

**JOHN RIDGEWELL**
